PROFILE

I discovered the magic of code and fell in love with front-end development. Being able to write and watch it transform into responsive and creative designs blows me away every time. I consistently work with HTML, CSS, JS, React, and Tailwind but am a fast learner and have no worries about picking up new tech. I strive to learn every single day and look forward to my future in tech.

SKILLS

- Web Design
- JavaScript
- HTML
- CSS
- React.js
- Next.js
- Tailwind

EXPERIENCE

FREELANCE DEVELOPER

2022 - Present
